Activity Description:

Warrick County will use grant funds to demolish and clear a building that was damaged beyond rehabilitation by two powerful weather events as a result of which the county was included in a declaration of a Federal Disaster under FEMA-1795 and FEMA-1828. The building is also listed as an Indiana Brownfield. The building contains asbestos in the flooring, ceiling and walls; there is pervasive interior mold and mildew as a result of extensive damage to the roof; structural cracking, deterioration and failure of the building’s brick and concrete block exterior; and broken windows are some of the major issues. The demolition and clearance of the building is essential to protecting the health and safety of the residents of Warrick County and is a key component to maintaining the economic viability of the downtown Boonville Public Square.

Activity Description:

The levee system helps protect the residents of the City of Evansville and Vanderburgh County from devastating floods. The proposed project includes improvements to the Ohio River Levee and will focus on alleviating the toe erosion occurring in the lower portion of the levee due to wave wash when the water level and winds are high. Other major components of the improvements include; re-grading the levee to return the slope to 3H:1V ratio, reseeding for erosion control, revetment toe protection, and the installation of riprap at the upstream and downstream ends and at a minimum of one foot vertically on the levee slope above the wave wash area.

Activity Description:

The risk of levee failure in the project area is considered a high possibility. A breach of Wabash Levee Unit 5 would impact 75 homes totaling 353 persons. Posey County will use grant funds to rehabilitate a 3,000 LF section of the Wabash Levee Unit 5 slope, slip line 27 corrugated metal pipes all of which are located along the Black River section of the levee and convert 12 sluice gates from electric to hydraulic. This project will help protect this disaster affected community and contribute to the economic recovery of the area.

Location Description:

Wabash River section in Gibson County located just west of CR 1675 West and along the Black River section in Posey County

Activity Progress Narrative:

Division 1 of the work is near completion. They are expected to finish their contracted work Mid October. Division 2 work is complete and retainage should be issued the first week of October. Division 3 work is 90%. The engineer anticipates the contracted work to be done early October.

Activity Description:

The Town of West Terre Haute is bordered by the Wabash River and protected by a levee that is approximately 2.5 miles in length. The Town will undertake a levee system evaluation study to assess the current condition of the levee. The evaluation will provide the community with a list of alternatives for the community to choose from in order to improve the levee system, obtain/maintain accreditation and demonstrate that the levee meets protection requirements for flood insurance purposes and to protect the health and safety of the community. This is important for the over all recovery of this disaster affected community.

Location Description:

West Terre Haute, Indiana on the Wabash River

Activity Progress Narrative:

The levee evaluation study is underway and the consultants have completed Phase 1 of 3 proposed phases of evaluation. Phase 2 is nearly complete.

The project includes the installation of two 54-inch Tideflex gate valves, two 24-inch Tideflex gate valves and a manual sluice gate. A pump station and control building will be constructed. The pump station is a critical component of the levee system and will effectively reduce the 100-year flood plain elevation. The improvements to the levee will prevent the back flow of the Wabash River into the canal and reduce flooding.

Activity Description:

The City of Indianapolis will use grant funds to assist EnerDel, a local manufacturer of lithium-ion batteries, purchase capital equipment which will result in the creation of 150 new full-time positions. EnerDel will purchase a binder dissolver machine, material handling processor, continuous batch oven, and a coil storage unit. The addition of this equipment is essential for the mass production of lithium-ion batteries.

Location Description:

EnerDel Inc
8740 Hague Road, Bldg. 7
Indianapolis, IN 46256

Activity Progress Narrative:

The grant was modified during the 2nd quarter 2012 and the amount reduced from 3,000,000 to 2,660,500 due to the decreased number of jobs to be created from 150 to 116. The Grant period was also extended to October 31, 2015. EnerDel increased the number of jobs to 72 total.

The City of Mitchell will use grant funds to assist Mitchell Industries to purchase a tubular twelve wire strander. The will allow the company to expand their product line and create 14 jobs of which at least 8 will be held by LMI persons. Assisting this company will contribute to the long-term economic recovery of the disaster affected community.

Location Description:

407 south street

Activity Progress Narrative:

Mitchell Industries Inc. is waiting for refurbished equipment which are required to complete renovations and upgrades needed for the strander. There has been a delay because equipment manufacturing is no longer in America. The December 31, 2012 grant end is believed to be sufficient time for equipment refurbishment.

Activity Description:

The grantee will use the grant funds to help NuSun with the purchase of specialized equipment for the semi-automated "photovoltaic" (PV) assembly line. This equipment will allow the company to manufacture nano-coated crystalline silicon photovoltaic solar panes for use in the US and international markets. The acquisition of this equipment will allow for the start up of a new manufacturing opportunity in an underutilized commercial building. The end product will be solar panels or modules to sell to energy companies for installation. This project will create 80 new jobs of which 41 will be held by LMI persons and contribute to the recovery of this disaster affected community.

Location Description:

NuSun, Inc.
7440 S. International Drive
Columbus, IN

Activity Progress Narrative:

NuSun Inc. is proceeding more slowly than anticipated because of other company obstacles such as building construction and expansion. Currently NuSun has been assembling solar modules since February 2012 and all key positions have been filled. All funds are expected to be expended by December 31, 2012 and job creation completed July 31, 2013.

Activity Description:

The City of Portland like many small towns has experienced job losses with the closing of two manufacturers over the last few years. The City will use grant funds to assist a for profit company to expand and create 20 new jobs in their community. Eleven of the jobs will be filled with LMI persons. The company will purchase and overhead crane to be used in the aluminum casting manufacturing. Job creation is important to the overall recovery of Portland.

Location Description:

Fort Recovery Industries
Portland IN

Activity Progress Narrative:

The investment and installation of Bridge Crane was completed July 2010, which completed the purchase of equipment related to the OCRA grant. As of the end of September there are 14 new full-time employee working at the Portland site.

Activity Description:

The project is the separation of a combined sewer which is needed because approximately 50 to 60 times a year the sewers are overwhelmed by incoming rainwater or melting snow that results in flooding in homes and businesses in the area. The Town is under an Agreed Order with the Indiana Department of Environmental Management and must correct the water quality issues by 2012. The Town of Speedway will use grant funds to install approximately 22,000 feet of storm sewer and new inlets and manholes. This will eliminate flooding in homes and businesses and contribute to the economic recovery of the disaster affected area.

Location Description:

Central downtown area between 10th Street and 16th Street and along the east and west sides of Main Street

Activity Progress Narrative:

The pre-construction conference was held June 23, 2011 and construction began July 2011. The project is 90% complete and no delays are anticipated at this time.

The proposed water system improvements include the following: complete rehabilitation of the interior and exterior of the existing 150,000 gallon elevated storage tank, replacement of all 380 existing meters with new radio read meters and improvements at the water treatment plant including installation of a new filter, replacement of the media in the existing filters, replacement of the high service pumps, chlorination system, electrical and SCADA systems. The water improvements project will greatly contribute to the long-term economic development of the Disaster affected area.

Location Description:

201 North Grant Avenue, Bainbridge IN

Activity Progress Narrative:

This project is now 100% complete. The Grant Administrator submitted Close Out forms 1 & 2 in September 2012. The town has also received a Grant Settlement Letter stating approval of Close Out forms 1 & 2.

Activity Description:

The City of Berne will use grant funds to make sanitary and storm water sewer system improvements through the construction of newer sewer lines and the addition of new sewer lining, in order to replace the existing combined sewer in the two designated areas. The grant funding will also be used to rehabilitate an existing lift station by lining the walls with hydrogen sulfite resistant epoxy coating, as well as adding the necessary electrical couplings so that the station can operate on the city's portable generator in emergency situations. The improvements made to the sanitary and storm water sewer system are crucial to the long-term economic recovery of the Disaster Affected Area.

Activity Description:

Most of the Town's water system has undergone major upgrades but the water mains have not. Breaks in the mains are becoming frequent and the majority of the water mains are 2" and 4" mains made of cast iron. These mains are not capable of handling the volume or pressure needed to handle the town's water needs and will be replaced. The Town will also replace six inoperable fire hydrants that are so aged that parts can no longer be found. These water system improvements are crucial to the long-term economic recovery of the Disaster Affected Area.

Activity Description:

The unincorporated area of Underwood is very rural and relies heavily on septic systems for sanitation. Many of these systems are failing and the County will use grant funds to extend sewer system service to the area. The proposed project includes the installation of a gravity sanitary sewer system. The system will consist of sanitary sewer lines flowing to a main collection pump station that will pump the waste to a wastewater collection system. A total of approximately 7,280 LF of force main will be installed as a result of this project. The construction of a gravity sanitary sewer system is crucial to the long-term economic recovery of the Disaster Affected Area.

Location Description:

Underwood
Clark County, IN

Activity Progress Narrative:

Financial Close-out for this project has been completed by OCRA. Close-out monitoring scheduled October 2012.

Activity Description:

The City of Jeffersonville will use grant funds to alleviate combined sewer overflows within the project area. A Consent Decree was signed in 2009 with the EPA and IDEM to correct overflow discharges. The proposed project includes the installation of 5,510 LF of storm sewer pipe (in order to alleviate the combined sewer system), lateral reinstatements, catch basins and surface restoration. These sewer system improvements are crucial to the long-term economic recovery of the Distaster-Affected Area.

Activity Description:

The Town of Lakeville will use grant funds to improve the water/drinking water systems through the construction of a new well and the installation of a filtration system. The proposed well will have a 300 GPM submersible pump and will be located in close proximity to the Town’s other existing well. The filtration system designed for a maximum flow of 100 gallons per minute at 60 psi. These water system improvements are crucial to the long-term economic recovery of the Disaster-Affected Area.

Location Description:

Lakeville, Indiana

Activity Progress Narrative:

The project is complete and all grant monies are drawn down. There is a dispute between the equipment supplier and the major contractor in which the final draw down of \$106,262.15 is being held in an escrow account. Parties are still actively working to resolve the issue.

Activity Description:

The Town of Remington will use grant funds to make improvements to the wastewater system infrastructure. The plan includes the installation of CIPP lining on 9,101 feet of sewer pipes. At the wastewater treatment plant, improvements include making splitter-box improvements, installing a hydraulic curtain, and improving some influent-flow-piping modifications. A new 10,000-gallon chlorine contact tank will be constructed as a part of the disinfection system. Improvements to the solids-handling system will include a new portable sludge pump, minor piping modifications, and new sludge-holding- tank surface mixer/aerator. A new pump will be installed at the main lift station. These wastewater system improvements are necessary for the long-term economic recovery of the Disaster Affected Area

Location Description:

Remington, IN

Activity Progress Narrative:

Project complete. Extension requested because of sub contractor dispute. The town attorney is attempting to resolve the problem without litigation.

Activity Description:

The severe storms and flooding in the spring of 2008 caused tremendous stress on the aging water and wastewater systems. Failures at the lift stations resulted in backed up sewage in homes and businesses. The Town will use grant funds to make improvements to the water and wastewater systems. Improvements include: a new chemical storage building, new chlorination equipment and piping, chlorine contact tank shelter, replacement of lagoon aeration equipment, electrical and controls upgrades, replacement of discharge pipe, chemical room improvements, electrical upgrades, replacement of fire hydrants, replacement of gate valves and the existing main. These improvements will contribute to the long term economic recovery of the community.

Activity Description:

Bourbon contains several areas within the city limits where the existing storm water infrastructure is either inadequately sized or seriously aged and crumbling. As such the existing infrastructure does not adequately drain the streets and residential lots during large storm events resulting in water damage to homes and high water in the streets interfering with traffic. The project will replace 7,466 LF of undersized and deteriorating pipe, 43 manholes, pavement restoration and erosion control. The project will contribute to the overall recovery of this disaster affected community.

Activity Description:

The unincorporated town of Dubois does not have a full storm water drainage system and what does exist is a collection of private culverts, county drainage tiles and open ditches. Some of the components date back to the 1840's and consists of old concrete and brick tiles without bells. The current system is ineffective and results in flooding of homes, yards and streets. The proposed project will consist of 18,515 LF of improvements, replacement of inlets and manholes and sidewalks and curbs will be replaced. This project will contribute to the overall economic recovery of this disaster affected community.

Location Description:

Throughout the unincorporated town of Dubois, Indiana in Dubois County

Activity Progress Narrative:

The project is complete and has entered close-out. Grant monitoring scheduled for October 2012.

Activity Description:

The County will use grant funds to make improvements to the storm drainage system in and around the Town of Akron. Residents have experienced flooding of their homes and damage to furnace units, water heaters, sump pumps and driveways and the community is unable to further develop much of the available land in and around the town due to standing water. The project will consist of the replacement of 11,250 LF of undersized and degraded pipe, installation of erosion control measures and the complete excavation of the entire Sears/Leininger drain. The project will contribute to the overall recovery of this disaster affected community.

Location Description:

Sears/Leininger Drainage Basin in Fulton County Indiana in Akron, Indiana

Activity Description:

The Warrick County surveyor has identified 33 logjam located on an 18 mile stretch of Little Pigeon Creek that are classified as Condition 3 or 4 by the log jam guidelines provided by the Indiana Department of Environmental Management . The severity of the logjams is directly lined to the 2008 disaster. 174 homes lie within the identified area and 463 people could face a serious threat if these logjams remain in place, disrupting existing drainage patterns. The project consists of the removal of the identified logjams. This project will contribute to the overall recovery of the disaster affected area.

Location Description:

Various locations along an 18 mile stretch of Little Pigeon Creek in Warrick County Indiana beginning at the Ohio River and extending north.

Activity Progress Narrative:

Phases 2-7 of the project are complete. Contractors have been paid for the work and retainage has been released to them. Two contractors bid on the final phase and after taking the bids under review both bids were deemed "invalid" by the attorney. The county is in the process of re-advertising and re-bidding the final phase of the project. Bid opening and contract award are scheduled for the 3rd week of October.

Jasper County will use grant funds to remove log jams from 31 locations on the Iroquois River. A contractor will be hired to cut and remove the debris from the river. The debris will be piled, tied down and secured on the bank or burned using an air burner. Many of these log jams were enlarged due to the severe weather events in 2008. It is anticipated that clearing the river will help alleviate flooding.

Activity Description:

The proposed project is to remove logs, sediment and other debris in Shelley Creek and tributary channels. Log jams in the project area are rated as either 3 or 4. The flood of June 2008 eroded the banks of Shelley Creek and caused many trees to fall into the channel. After the log jams are removed, the site will be restored to a stable condition to minimize future erosion and sedimentation of the creek.

The Town of Moore Hill has been on a sewer ban since 1999 and an Agreed Order with IDEM. It is a small community that can not afford to do the sewer system work without outside assistance. The proposed project includes upgrades to the existing lift station, construction of a new sanitary sewer force main and construction of a new wastewater treatment facility. These improvements will contribute to the long-term economic recovery of this disaster affected community.

Location Description:

Activity Description:

The Town of Spencer was significantly impacted by the flooding of May/June 2008 (FEMA 1766) and parts of the wastewater system and treatment plant sustained damage. The proposed project will address structural and inflow/infiltration problems within the wastewater collection system in order to maintain the integrity and function of the sewer system. The long-term impact of the project will result in the sanitary sewer system being able to handle increased capacity without experiencing overflows. The proposed improvements will also allow for economic and residential growth on the system. These improvements will contribute to the long-term economic recovery of this disaster affected town.

The Town of Dana is requesting DR2 grant funds to construct a new wastewater treatment plant and collection system. Although the Town does have a municipal water utility, it has never had a municipal wastewater utility. The lack of this important infrastructure has drastically limited the Town's ability to grow and prosper. The increasing number of failed septic systems in the community is compelling the project forward at this time. This new wastewater treatment plant is necessary for the long-term economic recovery of the disaster-affected area.

Activity Description:

The water quality of the drinking water in the City of Dunkirk is not adequate to meet IDEM standards despite the fact that the treatment system is only about ten years old and many of the water mains are in poor condition. City officials have worked diligently to make the current system adequate but with no success. Dunkirk will use grant funds to make improvements to the water treatment plant and to replace selected water mains. Improvements will greatly improve the water quality and improve fire protection. These water system improvements are necessary for the long-term economic recovery of the disaster-affected area.

Activity Description:

Due to a number of individual septic system failures and the need to accommodate new commercial and industrial development a new wastewater system is needed. The town of Montezuma will use grant funds to construct a new municipal wastewater treatment plant and collection system. A 70,000 gallon per day re-circulating sand filter treatment plant and a vacuum collection system are the major components of the project. These improvements will contribute to the long-term economic recovery of the disaster affected community.

Activity Description:

Columbia City has a sewer system receiving flows from both combined sewer areas and sanitary sewer. The sewer system has combined sewer overflows (CSOs) to the Blue River and Philips Ditch. This project will add more in-line capacity to help deliver more mixed sewage to the plant and put in place a 3 million gallon holding tank at the plant to capture sewage at the plant when there is no capacity to treat it. These wastewater system improvements are necessary for the long-term economic recovery of the disaster-affected area.

Columbia City had 2 separate 200 year rain events in 2008. In order to decrease the number of overflows of the sewer system, the project will increase the size of the dedicated combined sewer piping to the plant, installation of an off-line equalization basin and other improvements to the sewer system. These improvements are necessary to the long term and economic recovery of the City.

The Brown County commissioners are applying on behalf of the Brown County Water Utility, Inc for a waterworks improvement project. Brown County Water (BWC) is in need of additional groundwater supply and water storage and treatment capacity that meets the operating guidelines issued by the Indiana Department of Environmental Management. The proposed project consists of the addition of two water supply wells, construction of a 2,000 gpm water treatment plant (WTP), a 12” main connecting the new wells to the new WTP and the construction of a 1,000,000 gallon clear well for additional water storage at the WTP. Activity Description:

The City of Washington will use Disaster Recovery grant funds for a combined sewer overflow (CSO) project that has been mandated by an agreed order from IDEM. The proposed project includes the construction of a vortex type grit removal unit at the WWTP. The new wet-weather facility will include a 3.9 MG storage tank with submersible type pump station and automatic flushing gates, and a constructed wetland with fine screening and a UV disinfection system. Modifications will be made to the existing headworks diversion structure. The proposed work also includes the installation of a CSO pump station to convey flow from this CSO to the storage tank. Conveyance piping includes two 84-inch wetland influent pipes, a 36 inch pipe and construction of a wetland treatment facility. These wastewater system improvements are vital to the long-term economic recovery of the disaster-affected area.

Activity Description:

The Spencer County Commissioners, on behalf of the Luce Township Regional Sewer District, are applying for a Disaster Recovery grant to construct a new sanitary sewer collection system. The collection system includes the installation of approximately 159,700 feet of sewer lines, 560 grinder pumps, five lift stations and about 86,300 feet of force main. The sewer district will collect wastewater from Richland, Hatfield, Sandridge, Eureka, French Island Boat Club and areas in between. This new system will address failing septic systems in the service area. These improvements will contribute to the long-term economic recovery of this disaster affected area.

Location Description:

various locations in the Luce Township Regional Sewer District including Richland, Hatfield, Sandridge, Eureka, French Island Boat Club and areas in between.

Activity Progress Narrative:

The project is substantially complete and final grant fund payments are pending. Employee interviews have been conducted regularly and certified payrolls submitted weekly.

Activity Description:

Oakland City will use grant funds to rehabilitate their wastewater treatment system. Lift stations will be rehabilitated, manholes will be replaced and the plant will be upgraded to better handle the current flow and prevent inflow and infiltration events. Much of the current system has outlasted its life expectancy and the proposed rehabilitation will allow the plant and collection system to continue to serve the community. These improvements will contribute to the long-term economic recovery of the disaster affected community.

locations throughout the town and at the treatment plant.

Activity Progress Narrative:

The project is near completion. However, due to a few unforeseen circumstances the City will potentially submit a request for time extension November 30, 2012. 93 percent of the grant money has been drawn and the remaining will be used to pay the contractors.

Match Contributed	\$0.00	\$0.00

Activity Description:

In order for the Town to comply with their Agreed Order in operating the sewage collection system and wastewater treatment system efficiently and effectively, improvements to the sewage collection and treatment facilities are necessary. The project will include the addition of approximately 1,475 lineal feet of piping improvements, installation of an influent flow meter and flow control valve, removal of an inoperable grit system and installation of a new system, new clarifier, rehabilitate existing clarifiers and the installation of an UV system. These improvements will contribute to the overall economic recovery of this disaster affected community.

Location Description:

At the wastewater treatment plant in Crothersville, Indiana and the west and east sides of US 31 and at 3 crossings under US 31.

Activity Progress Narrative:

The project began January 2012 with mobilization, February raw sewage wet well excavated and poured, and March dewatering pumps moved and clarifier excavation began. Construction is on schedule.

Activity Description:

Rehabilitation/reconstruction of residential structures

Location Description:

Indianapolis, Marion County, IN

Activity Progress Narrative:

Currently, Barton Annex Apartments with Mattcon Construction: Construction on the common areas started June 2010 and it is 100 percent complete. The project includes the renovation of common spaces (no units), including bathrooms, community areas, office spaces and hallways. Replacement of flooring, ceiling tiles, lighting, kitchen cabinets, appliances, bathroom fixtures and furniture will also occur.

>Currently, Barton Tower Apartments with Sheil Sexton, Inc.: Construction started August 2010 and is scheduled for completion July 22, 2012. We have started construction on 246 units and 242 units are complete. The project contains 246 residential units and 5 office spaces. The renovation is divided into 9 phases. The first phase included 37 units; the second phase included 57 units. The third phase includes 38 units and these units were completed in November, 2011. Phase 4 is 76 residential units and Phase 5 is 39 units, scheduled for completion November 2012. Phase 6 is the midtown office renovation which is complete. Phase 7 is the first floor common areas, computer lab and additional office spaces. Phase 8 is the 15 floor common areas and community kitchen. Phase 9 is the laundry rooms. Phases 6-9 are scheduled for completion November 2012. The 38 unit of the first phase will remain utilized as construction office/space and will be turned over at the end of the renovation contract. The building's plumbing and heating systems are being replaced, as such all units are receiving new plumbing fixtures. The units will also receive new kitchen cabinets, flooring, paint, blinds, entrance doors and a new electronic key system.
